Risk Distribution Commentary

As of 2026/06, CreditLens has profiled 10,127 customers. Of these, 1,645 (16.24%) are classified as high churn risk with a score exceeding 0.70. The portfolio-wide average churn risk score stands at 0.1865. The fraud detection module flagged 473 transactions as anomalous. Retention campaigns should prioritize high-risk segments identified above.

Model & Data Notes

- Churn Risk Score: XGBoost classifier trained on BankChurners dataset.
- Segmentation: K-Means (k=5) on credit/transaction/risk features.
- Fraud Detection: Isolation Forest on creditcard.csv (V1-V4, Amount).
- High-risk threshold: churn_risk_score > 0.70.
